2. The impact of particular legal and market institutions, including accounting, on financial markets and corporate actions, and innovation, economic growth and stability.
3. The co-evolution of the legal rules and market institutions that govern financial sector activity, that activity itself, and the nature of the broader economy and financial markets.
4. The regulation, organization, and performance of financial institutions.
5. The relationships between the structure and performance of financial institutions, and the performance of these institutions and the overall performance of financial markets and economies.
7. The political economy of the regulation of corporate governance, financial institutions, and financial markets.
8. Accounting, finance, and legal issues concerning ownership and property.
