Company Introduction

The mission of now publishers is to improve scholarly communication, speed the flow of information, and reward the scientist. The company uses modern techniques to minimize costs that enables us to significantly compensate authors and editors for their efforts, and pass on cost-savings to librarians.

Quality

The editorial board members, led by an eminent figure as editor-in-chief, are the top researchers and teachers in each field. Authors are selected on the basis of their recognized standing as experts in their subject. Strict peer-review further ensures that quality is maintained consistently high across the products.

We believe once a customer makes a purchase that content is theirs to use as they wish. Remote access and course pack use are included as standard in a subscription.
